Data Analyst with hands-on experience in collecting, processing, and analyzing large datasets to generate actionable insights for business decision-making. Proven ability to ensure data accuracy through validation and cleaning processes, while developing dashboards and reports to support operational and performance monitoring. Proficient in SQL, Excel, and Python, with experience in data visualization using Tableau and Power BI. Strong analytical thinking and attention to detail, with a portfolio of projects demonstrating end-to-end data analysis and problem-solving skills.

SKILLS

- **Data Analytics & Visualization Tools:** Microsoft Excel, SQL, Visualization (Tableau, Power BI), Python, Data Science.
- **Core Skills:** Data Cleaning, Data Validation & Accuracy, Data Visualization, Data Processing & Reporting, Analytical Thinking, Cross-functional Collaboration, Problem Solving, Communication, Adaptability.

WORK EXPERIENCE

OPPO Indonesia Manufacturing

Kota Tangerang, Banten • 12/2025 - Present

Data Analyst (HR Analytics) • Internship

- Collected and transformed raw HR datasets (38,000+ attendance records, 19,000+ employee records, training, and disciplinary data) using Excel and Power Query, automating data preparation and reducing manual processing time by over 90%.
- Developed dashboards using Power BI to monitor key operational HR metrics, improving reporting speed and enabling better visibility for decision-making.
- Analyzed and improved reporting structures by enhancing data organization and visualization, increasing clarity and usability for stakeholders.
- Identified and resolved data discrepancies, improving data reliability and supporting accurate business reporting.

Universitas Islam Negeri Jakarta

Ciputat Timur, Banten • 04/2024 - 08/2024

Data Digital Transformation Project • Part-time

- Digitized 750+ HR documents and built a structured tracking system in Google Sheets, improving data accessibility and efficiency.
- Optimized Google Drive for organized digital archiving while maintaining strict data accuracy and confidentiality during the physical-to-digital transition.

PROJECTS

Bike Store Sales Performance & Trend Analysis

- Built an interactive dashboard using Tableau to monitor revenue, store performance, and product trends, supporting operational monitoring and business decision-making.
- Extracted and joined data from 7 relational tables using MySQL to create a ready dataset for analysis.
- Identified revenue concentration risk and sales decline trends, supporting strategic business recommendations.

E-Commerce Sales & Customer Analysis

- Analyzed customer and sales data to identify trends and opportunities for improving business performance and operational efficiency.
- Cleaned and merged multiple relational datasets using Python (Pandas), including handling missing values and standardizing multilingual data.
- Performed RFM (Recency, Frequency, Monetary) analysis to evaluate customer behavior and retention.
- Built an interactive dashboard using Streamlit framework, enabling real-time filtering and dynamic data monitoring.

EDUCATION

Bachelor of Informatics Engineering (Computer Science)

Universitas Islam Negeri Syarif Hidayatullah Jakarta • GPA: 3.78/4.00 (Cum Laude)

Indonesia • 07/2021 - 10/2025

CERTIFICATIONS

Data Analyst Bootcamp Certificate

DSAREA X JOBARA

Certificate of Completion: Belajar Dasar Structured Query Language (SQL)

Dicoding Indonesia

Certificate of Completion: Belajar Analisis Data dengan Python

Dicoding Indonesia

Certificate of Completion: Data Visualization with Power BI

DataCamp

Certificate of Completion: Exploratory Data Analysis in Power BI
